Fable 5.2: check controls first

Where Anthropic's Fable 5.2 and Mythos 5.2 run, what Anthropic's figures say and what to agree first

Where it runs

Platform	Fable 5.2	Mythos 5.2
Claude API	Yes	Verified orgs only
Amazon Bedrock	Yes	Verified orgs only
Google Cloud, Anthropic managed	Yes	Verified orgs only
Google Cloud, Google managed	Yes	Verified orgs only
Microsoft Foundry	Yes	Verified orgs only
Claude Platform on AWS	Yes	Not listed

Anthropic, Claude Docs, What's new in Fable 5.2. Regional availability is not stated.

Anthropic's numbers, and what they are

Benchmark	Fable 5.2	Compared with
FrontierCode 2.0	**49.1% (Xhigh effort)**	Opus 5.5 45.5%
AutomationBench	**51.4%**	Gemini 4 Carbon 53.9%
AA-Briefcase Elo	**1785**	Opus 5.5 1800
Price per million tokens in/out	**$8 / $40**	Fable 5.1 $10 / $50

Every figure is from Anthropic's own tests, run with safeguards on at highest available effort unless noted.

Controls to check first

1. Enterprise: Fable 5.2 stays off until an admin enables it, per the Claude Help Center
2. Anthropic's Claude Docs require 30-day data retention unless Anthropic authorizes otherwise
3. Anthropic says blocked queries fall back to Opus 4.8 or Opus 5
4. Anthropic's docs say computer_20251124 returns a 400 error except on Amazon Bedrock
5. Claude Help Center launch offer runs Nov 9 to Nov 16, 2026

What to tell clients

Consultiply's suggestion: start with Opus 5.5, as Anthropic recommends

Consultiply's suggestion: pilot one hard task on one client's own data

Consultiply's suggestion: agree who enables the model, what data it may use and which retention terms apply

Consultiply's suggestion: offer Mythos only to clients that qualify for a verification program
